

The vitamins and minerals contained within this protocol are consumed at therapeutic levels in accordance with years of peer-reviewed research supporting processes for remodeling the peripheral nervous system. This set of nutrients fortifies and accelerates the body's own natural ability to heal emphasizing on the peripheral nerves. The side effects have been proven to be better health.

In 2014 and after 8 years of suffering the prescribed effects of seizure medications and opiates, PN patient Bob Diamond gave up on his doctor's inability to help him recover. While living in pain and in a brain fog, he immersed himself in Google Scholar for weeks searching for a natural pathway to heal damaged sensory fibers and peripheral nerves. In a few months and to his surprise he landed on the facts. Using himself as a guinea pig to prove his Protocol, he applied the findings of his research resulting in a rollback of nearly 80% of his symptoms in less than one year as substantiated by his neurologist's examination. He shared his knowledge on social media and refocused his life by helping others. **#theprotocolworks**

Having some food in your stomach and properly hydrating using 80 to 100 oz of water daily when supplementing allows the digestive process to metabolize the vitamin and mineral supplements and provides the natural process of elimination for any excess unneeded nutrients through the kidneys. Do not drink adult beverages, they impede the healing process by dehydrating your body cells.

Instructions:

Take three tablespoons of Organic Hemp Seed Oil one time per day. Use the supplied measuring cup or a baking measuring spoon and fill the spoon three times. It is not necessary to consume three tablespoons all at one time, you can split it up into parts during your day. Some mix it into a smoothie, a yogurt, a salad dressing or a beverage like V8 Tomato Juice. Do not mix it in any hot beverage or cook with it, it will destroy the value of the oil.

Follow the instructions on the bottles lid which tell you how many capsules or for B12, sublingual tablets to consume at what intervals during the day. We expect the new enhanced blended formula to become available by mid-2022 which will be the blended version of this formula, reducing the number of capsules necessary to ingest.
